Disasters:**Declaration Number**

FEMA-1792-LA

Narratives**Disaster Damage:**

Hurricane Gustav caused major wind and flood damage throughout the state, from the southern coastal parishes through central and north Louisiana. Two weeks later Hurricane Ike hit sending tidal surges across the States southern coastal communities. Ike exceeded storm surge caused by hurricanes Rita and Katrina. More than 1.9 million Louisiana residents were forced to evacuate for hurricanes Gustav and Ike. Many of these residents were unable to return to their homes and jobs for a number of days and a large number of residents whose homes remain unlivable continue to need short-term shelter and longer-term transitional housing. The State was forced to evacuate 30,000 critical transportation-need residents, including 10,400 medical evacuations, which is the largest medical evacuation in U.S. history. The State was also left with 1.5 million cubic yards of debris from Hurricane Gustav along federal and state highways. Approximately 150,000 to 300,000 homes experienced some level of damage in the storm; more than 12,000 homes were flooded. Preliminary estimates show that approximately \$2 to 7 billion in residential property loss was incurred. Even homes built to the Federal Emergency Management Agencies Advisory Base Flood Elevations flooded as a result of this storm. The state also estimates more than \$1 billion in public infrastructure damage. The state has spent more than \$400 million in emergency response and immediate recovery activities. Fifty-three of the States 64 parishes were included in the Presidents disaster declaration for individual assistance; all 64 were declared for public assistance. The two storms caused tremendous damage, which, in turn, left most communities without electricity for days, and many for weeks. More than 120,000 homes received some damage.

Recovery Needs:

A large percentage of the States educational facilities received damage from the storm. Preliminary estimates indicate that there was at least \$100 to \$150 million in damages to the primary (including pre-K) and secondary education facilities. While most of these repairs will be covered through FEMA's public assistance program, certain repairs or necessary rebuilds may be deemed ineligible through FEMA's program. Hurricanes Gustav and Ike impacted many of the States port facilities resulting in large economic losses to the State and exposing the nation to large and significant economic impacts if long term disruptions were to occur from hurricane impacts as much of the Nations oil and gas, commodity and cargo traffic flows through south Louisiana facilities. While oil and gas enter the Nation through facilities in south Louisiana, many more commodities that are vital to the upper Midwest, and north and central Louisiana flow down the Mississippi River and are maintained at specific temperatures at port warehouse facilities along the Mississippi River before becoming exports. These raw products in turn employ thousands of Louisianans and create millions of dollars in economic value.

While the majority of public infrastructure repairs will be covered by FEMA programs, it is known from experience with the 2005

storms that there are certain costs of repair including improvements or rebuilding will be deemed ineligible for FEMA funding. Preliminary cost estimates for the repair of Federal Highway Administration (FHWA) eligible roads and bridges sustained as a result of Hurricane Gustav total \$127 million. Federal-aid highway damage estimates are about \$119 million. While funding to address these damages is authorized under current law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical infrastructure. To repair this critical infrastructure, \$119 million would be needed for Louisiana (Gustav - \$53 million; Ike - \$66 million) through the Federal Highway Administrations Emergency Relief program.

Preliminary estimates indicate approximately \$1.7 billion in uninsured housing losses, with over half of that amount likely being homeowners. Hurricanes Katrina and Rita have taught us that repair costs generally outstrip insurance proceeds. Initial damage models based on flood and wind damage vary widely, but have a midpoint between \$3 and 4 billion dollars. Half of this damage may be uninsured losses due to uninsured and underinsured properties.

With losses of housing stock concentrated in certain communities, Louisiana could have up to \$1.5 billion in uncompensated housing losses. Of this, the State will need to design programs in concert with local communities to rebuild and make up this loss. The State will develop the programs in concert with local communities to rebuild and make up this loss.

Based of the 2007 Summary of Agriculture and Natural Resources by the LSU Agriculture Center and NMFS Revenue Data, the seafood industries experienced nearly \$250 million in revenue loss as a result of the two storms. Even prior to hurricanes Gustav and Ike, Louisianas fisheries were struggling to recover from more than \$528 million in losses resulting from hurricanes Katrina and Rita in 2005. Hurricanes Gustav and Ike moved across the central Gulf of Mexico through some of the Nations most valuable and productive fishing grounds at the start of the States most valuable shrimp season.

Overall Progress Narrative:

Quarter 1: January 1, 2019 – March 31, 2019

The State of Louisiana, Office of Community Development, Disaster Recovery Unit continued to move both projects and programs to completion. Total expenditures exceeded 90% during the quarter. Although expenditure rates have not significantly increased, the rate of expenditures remained steady from last quarter. Close out of completed projects and programs continues to be a major focus. Program managers continue to work with grantees to reallocate remaining funds from completed projects and programs to existing programs or new initiatives.

As the number of active state-run programs continue to decline, project and program managers are focused on closing out the remaining projects and reallocating funds as programs reach completion.

Parish grantees continue to amend allocation budgets due to projects coming in under budget or acquiring other funding sources and other projects being deemed no longer viable due to permitting or other issues. The budget reallocations are resulting in additional funds for existing projects and alternate projects being moved up to priority status. Among approved parish projects representing over \$562 million in funding, more than \$500 million or 89% has been expended among 56 parish grantees.

Management and close-out staff continue to systematically track project completions and notify grantees that close-outs are due. As of the end of this quarter, 494 G/I activities have been closed with 483 of those in final close-out status and eleven of those conditioned upon final audits. This represents 65% of all G/I activities. Close-out efforts at the local level is also enabling grantees to reallocate funds as needed to existing disaster recovery projects, in particular drainage, sewage and road repair that may require additional mitigation or adjustments once the work needed can be thoroughly assessed.

The OCD-DRU's project managers continue to provide technical assistance as well as convene monthly calls with grantees to ensure that progress is continually being made on projects that have impediments.

Activity Description:

This project consists of drainage improvements to Turner Canal, beginning at its intersection with La. Hwy. 115, thence extending a distance of approximately 2.8 miles in a southerly direction. The project also includes drainage improvements to an un-named tributary of Turner Canal, beginning at its intersection with Turner Canal, thence extending a distance of approximately 2,600' in an easterly direction to the corporate limits of the City of Bunkie. This project will increase the hydraulic capacity of the Canal. The probability of flooding in the area will be significantly reduced.

Location Description:

Bunkie, La. - Avoyelles Parish

Activity Progress Narrative:

There were no expenditures in this quarter.

Activity Description:

This project involves the reconstruction of the Lightning Street Bridge to adjust the elevation. The existing bridge spans approximately 76 feet and consists of precast concrete deck panels, precast concrete pile caps with timber pile substructure. The timber piles are in poor condition with substantial physical deterioration. Proposed improvements consists of the demolition of the existing bridge in its entirety and replacement with a new bridge structure consisting of drilled concrete shaft piling with precast concrete caps, deck panels and guardrail. The existing concrete revetment under the bridge will be replaced with new cast in place revetment. An existing water main attached to the existing bridge will be replaced with a new water main to be attached to the new bridge structure. The new bridge superstructure (caps, deck and guardrail) will be located above the 100 year base flood elevation as established by FEMA Flood Studies for the City of Sulphur incorporated area. Street approaches for the bridge will be rebuilt/raised to accommodate the new higher bridge.

Location Description:

Lightning Street, Sulphur, LA

Activity Description:

The Parish completed extensive research with all of the Fire Districts located within the unincorporated areas of the Parish to determine the need for new wind rated bay doors. The need is tremendous. The total list of bay doors needed is sixty five. The current budget for the project will only allow for the installation of ten of the sixty five bay doors. The list of doors requested was reviewed and prioritized. The current budget for the project will allow for the installation of new bay doors at the following locations:

- 1738 Sutherland Road - 2 doors
- 1000 Topsy Road - 2 doors
- 134 Fire House Road - 3 doors
- 2888 Cardinal Lane - 2 doors
- 5599 Hwy 14 East - 2 doors
- 2991 Gauthier Road - 6 doors
- 9253 Gulf Hwy - 2 doors
- 789 W Houston River Road - 4 doors
- 1786 Hwy 90 - 2 doors
- 3495 Hecker - 4 doors

All bay doors at each station will be replaced to ensure the entire facility is secure from wind and water damage.

Program Income Received	\$0.00	\$0.00
Total Funds Expended	\$0.00	\$10,850.00
Calcasieu Parish Police Jury	\$0.00	\$10,850.00
Most Impacted and Distressed Expended	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The purpose of the project is for the hardening of the Parish Animal Services Facility. In order to provide protection to the animals housed at the Animal Services Facility during Hurricane Gustav, parish employees were required to relocate the animals to alternate facilities. The hardening of this facility will provide the necessary protection required to safely accommodate the animals and Parish staff required to care for the animals during future storm events.

Location Description:

5500-A Swift Plant Road, Lake Charles, La. - Calcasieu

Activity Progress Narrative:

There were no expenditures in the quarter.

Activity Description:

Calcasieu Parish Police Jury is requesting CDBG Disaster Recovery funds for the purchase and installation of two (2) permanent auxiliary power generators for the Louisiana Way Sewer Pump Station and Water Well No. 5 and associated appurtenances. The proposed generators will provide full power to the sewer pump station and water well allowing them to remain fully functional during future power outages.

Location Description:

903 Miller Ave and 1400 1/2 National Dr., Westlake, LA 70669

Activity Progress Narrative:

Activity in the QPR as a result of a change in the action plan (end date changed). No expenditures in the quarter. Also, funds were moved from Continuum Care, Public Facilities Generators, and Westlake Generators activities to 901 Lakeshore activity within same project thus no APA necessary.

Activity Description:

The purpose of this project is to construct new bridges on E Chimes, E Garfield, and Taylor St to reduce water backup that caused significant flooding during Hurricane Gustav.

Location Description:

Baton Rouge, La. - East Baton Rouge

Activity Progress Narrative:

This request is for final engineering services E. Chimes, E. Garfield, and Taylor St. bridges. Also, there were miscellaneous budget changes within the same project thus no APA necessary.

Activity Description:

Fifty-seven (57) bridges in East Baton Rouge Parish are currently rated four (out of 9) or below, a marginally poor to critical condition warranting major rehabilitation to replacement, or closure. Nineteen (19) of these fifty-seven are load rated to 15 tons or below for safety reasons and are not considered adequate for heavy trucks, traffic associated with heavy vehicles utilized by first responders (fire trucks, debris movers...), garbage trucks, or school buses. These bridges are mostly structurally supported by timber. Woodland Ridge at Jones Creek, Cayhanga Parkway at Jones Creek, Claycut Road at Ward Creek, Port Hudson-Pride Road at Little Sandy Creek and Mollylea at Jones Creek are some of the aforementioned bridges. These bridges are considered structurally inadequate to withstand the forces associated with surge waters and riverine flooding from storms such as hurricanes. The possibility of a failure occurring on one or more of these bridges during a future storm event such as a hurricane, would create an unnecessary and dangerous burden on those trying to evacuate or service the area. New bridges will be all concrete and surge resistant and structurally superior to what exist today with new approaches to handle any type of vehicle that may be subject to crossing during an evacuation or emergency situation.

It was also noticed bridges with a timber substructure pile configuration tended to “hang-up” more debris increasing the likelihood of upstream flooding. These bridges have notable hydraulic grade jumps (increase in flood water surface elevation) at the upstream side caused by constrictions in the stream channel at the bridge locations. During intense rainfall events associated with hurricanes, upstream flooding is a real potential threat in these immediate watersheds. Hydraulic capacity of each of these bridges is considered to be inadequate. The bridges are not adequately sized to handle the large amounts of water associated with stream flooding and extreme rainfall. The accumulation of excess water at these undersized structures, immediately after Hurricane Gustav, caused water to back up resulting in significant flooding upstream and downstream of the bridges and

along the roadside ditches. The installation of an adequately sized bridge would prevent this problem from occurring in the event of future floods or hurricanes.

For these structures, it will be necessary to conduct a complete topographic survey, create a comprehensive design study, and prepare plans and specifications to construct a new and functional bridge. These proposed bridge improvements will not only increase the load capacity and safety of each bridge but will also aid the parish in the economic recovery of Hurricane Gustav. Increasing the bridge spans will increase their hydraulic capacity and reduce the upstream impoundment of storm water by allowing it to flow more freely and recede at a much quicker rate during future events of storm and riverine flooding.

Location Description:

9647 Cuyhanga Parkway, Baton Rouge, LA 70815

Activity Progress Narrative:

This request is for retainage payout for Cuyhange Parkway and construction costs for Mollylea and Claycut Rd. bridges. Also, there were miscellaneous budget changes within the same project thus no APA necessary.

Activity Description:

Fifty-seven (57) bridges in East Baton Rouge Parish are currently rated four (out of 9) or below, a marginally poor to critical condition warranting major rehabilitation to replacement, or closure. Nineteen (19) of these fifty-seven are load rated to 15 tons or below for safety reasons and are not considered adequate for heavy trucks, traffic associated with heavy vehicles utilized by first responders (fire trucks, debris movers...), garbage trucks, or school buses. These bridges are mostly structurally supported by timber. Claycut at Dawson Creek, Greenwell Street at Roberts Canal and Milldale at Beaver Bayou are some of the aforementioned bridges. These bridges are considered structurally inadequate to withstand the forces associated with surge waters and riverine flooding from storms such as hurricanes. The possibility of a failure occurring on one or more of these bridges during a future storm event such as a hurricane, would create an unnecessary and dangerous burden on those trying to evacuate or service the area. New bridges will be all concrete and surge resistant and structurally superior to what exist today with new approaches to handle any type of vehicle that may be subject to crossing during an evacuation or emergency situation.

It was also noticed bridges with a timber substructure pile configuration tended to “hang-up” more debris increasing the likelihood of upstream flooding. These bridges have notable hydraulic grade jumps (increase in flood water surface elevation) at the upstream side caused by constrictions in the stream channel at the bridge locations. During intense rainfall events associated with hurricanes, upstream flooding is a real potential threat in these immediate watersheds. Hydraulic capacity of each of these bridges is considered to be inadequate. The bridges are not adequately sized to handle the large amounts of water associated with stream flooding and extreme rainfall. The accumulation of excess water at these undersized structures, immediately after Hurricane Gustav, caused water to back up resulting in significant flooding upstream and downstream of the bridges and

along the roadside ditches. The installation of an adequately sized bridge would prevent this problem from occurring in the event of future floods or hurricanes. Majority of the areas drained through the channels that pass beneath these bridges are low to moderate income areas (LMI).

For these structures, it will be necessary to conduct a complete topographic survey, create a comprehensive design study, and prepare plans and specifications to construct a new and functional bridge. These proposed bridge improvements will not only increase the load capacity and safety of each bridge but will also aid the parish in the economic recovery of Hurricane Gustav. Increasing the bridge spans will increase their hydraulic capacity and reduce the upstream impoundment of storm water by allowing it to flow more freely and recede at a much quicker rate during future events of storm and riverine flooding.

The target structures for this project, shown in the attached Project Map, include the geographical areas of these bridges. No acquisitions are expected to be required for these projects. All improvements will be completely within the existing right-of-ways of East Baton Rouge Parish; however temporary construction servitude may be required. East Baton Rouge Parish will retain ownership of the replaced bridges and approach spans and be responsible for the future inspection and maintenance of the proposed replacements. The replacement of this bridge is expected to reduce the cost of maintenance; therefore, no additional funds will be necessary for maintenance following these improvements.

Location Description:

8232 Greenwell Street, Baton Rouge, LA 70812

Activity Progress Narrative:

This request is for construction costs for Claycut Rd. over Dawson Creek bridge. Also, there were miscellaneous budget changes within the same project thus no APA necessary.

Activity Description:

The East Baton Rouge Redevelopment Authority ("RDA"), as part of the disaster recovery initiative, will purchase and develop a 196-acre tract of vacant land commonly referred to as Smiley Heights ("property"); located in a distressed urban community in North Baton Rouge called Melrose East. The development of this property will realize a community-driven strategic vision for a mix of educational institutions, new retail, commercial development, and mixed-income residential units in a green, walkable setting. In addition, the physical and natural conditions of the site lend an opportunity to introduce sustainable approaches to site resource management. Once completed, this project will create educational campuses, thriving commercial areas, successful neighborhood businesses, access to equitable quality jobs, and new affordable and market-rate housing options.

Location Description:

Smiley Heights Neighborhood, Baton Rouge, LA 70806

Activity Progress Narrative:

Match Contributed	\$0.00	\$0.00

Activity Description:

The East Baton Rouge Parish Small Business Recovery Loan Program is being created to provide disaster recovery and assistance to small businesses and to catalyze economic development in neighborhoods directly impacted by Hurricane Gustav. The assistance may be in the form of loans for working capital, capital improvements, and equipment financing, and the provision of pre-financing and post-financing technical assistance to applicants. The program is designed to provide assistance to small businesses that are currently located in or will open in an area suffering from the long-term effects of hurricane Gustav and will consider requests for financial assistance from business owners that were either directly impacted by Hurricane Gustav or that established businesses post-Hurricane Gustav in designated recovery districts. Included in priority loans would be business owners who believe their businesses can be reopened or expanded and have been unable to secure financing from conventional sources.

Location Description:

Across East Baton Rouge Parish, LA

Activity Progress Narrative:

EBR Parish amendment reduced this activity budget (no APA necessary).

Activity Description:

During Hurricanes Gustav and Ike, the Sunshine WWTP became nonoperational, however the plant continued to receive wastewater from those drainage basins that still had electrical service for pump stations or had direct gravity flow connection to the treatment plant. As flow reached the plant on the front end, it continued to be routed through the treatment plant, although much of the equipment was inoperative and still discharged out the backend of the plant into Bayou Paul. The effluent was being discharged into the coulee that was at that time suffering from backwater flooding. The circumstances of continued discharge of sewage combined with backwater flooding resulted in sewage effluent being spread over the flooded topography. The situation did not improve until the swamps drained down thereby allowing Bayou Paul to also drain. The construction of a new pump station and force main to discharge directly into the Mississippi River will provide a solution to the unsanitary situation that existed when flooding of the Bayou Paul basin occurs, by rerouting sewage effluent to the Mississippi River.

Activity Description:

Nature of Project:

The purpose of this project is to provide standby emergency power for critical services in the City of St. Gabriel. The critical services covered will be three sewer treatment plants.

Description of the Problem:

During time of Hurricanes Gustav/Ike, The City of St. Gabriel, experienced widespread loss of electricity. With this loss of electrical power, the City lost its ability to treat raw sewage, posing an immediate threat and harm to the safety and welfare of the citizens of the City of St. Gabriel. There was also a loss in the supply of potable water. Due to the City's loss of critical systems during Hurricane's Gustav/Ike, maintaining critical services during power outages is essential to the health and safety of the community.

Location Description:

St. Gabriel, Iberville Parish, LA

Most Impacted and Distressed Expended	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The proposed improvements would consist of erosion protection where Alligator Bayou discharges into Bayou Manchac, demolition of an undersized 8' x 8' box culvert, installation of a double 8' x 8' reinforced concrete box culvert with automatic controlled flood gates and operators, construction of a water access ramp to Alligator Bayou and Bayou Manchac to allow for access for maintenance and clearing of debris from the improvements, and construction of a control tower and related scada communications equipment and auxiliary power generator for operations of scada and automatic gate closure equipment in times of local power outages. The auxiliary power generator would be sized to handle small horsepower motors that drive the gates for lifting and for control panel and scada operation. The generator would be diesel and have a rating of 10 kW.

Location Description:

St. Gabriel, LA

Activity Progress Narrative:

Wharton-Smith Pay Application #12 in the amount of \$26,695.81 for Construction Services; Wharton-Smith Pay Application #13 in the amount of \$120,112.76 (Retainage) for Construction Services; and Wharton-Smith Pay Application #6 in the amount of \$9.00 (Short Pay) for Construction Services; Pan American Engineers Invoice

#25434 in the amount of \$8,978.17. Also action plan changed for end date.

Activity Description:

The proposed improvements are designed to mitigate flooding in the City of Plaquemine similar to what occurred during Hurricane Gustav/Ike. The revetment or slopping will provide bank stabilization and will ensure increased flow during future storm events, relieving the City of flooding and erosion, alleviating current maintenance issues, and ensuring the health and safety of the residents. Iberville Parish's Hazard Mitigation Plan (2010) contains flood control as a high priority and the proposed Project will mitigate localized flooding around the channel.

Activity Description:

The construction of a new public boat launch will address the failures that occurred during previous hurricanes by:

1. Provide additional parking for emergency personnel as well as additional parking for commercial and industrial users.
2. Provide additional boat launch to increase the capacity for the launching and recovery of boats and fishing vessels.
3. Provide for shorter waiting periods and quicker response time for boat launching during search and rescue efforts for missing boaters, water accidents and hurricanes.

The new public boat landing will provide the source of a much needed additional access point to the waterways of Iberville parish. This will provide adequate capacity to ensure residents, fisherman, oil field personnel, and local, state and federal emergency personnel access local waterways.

Activity Description:

This project will provide a citywide benefit, which according to the 2010 U.S. Census, has a population of 8,534 persons, all of which are served by the City's water facilities. The City of Westwego consists of three (3) distinct CDP areas (CDP's 27100, 27200, & 27602). The residential population of Westwego resides in CDP's 27100 & 27200; CDP 27602 has developed as a commercial and industrial area, serving traffic on the Mississippi River. In a comprehensive review of 2010 U.S. Census data, it was found that that the City of Westwego has a low-to-moderate income (LMI) population of 5,474 residents, which constitutes a 64.1% LMI percentage.

Activity Description:

The project/activity is to construct a communications tower for Livingston Parish that will include Parish operations, the sheriff, 12 fire parish operations, 7 municipal governments, 911 and room for the Governor's Office of Homeland Security. Lower tower space between 200 and 350 feet would be available to lease to private interests, such as cell phone companies. The proposed communications tower is expected to be at elevation of 800 feet to 1,000 feet depending on the design and specified area of coverage. It will be constructed on land already owned by the parish adjacent to the sheriff's training facility.

Location Description:

Livingston Parish, Louisiana

Activity Description:

The primary focus of this project is the berm/plug/levee to be placed across the old, original, Southward route of Cypress Bayou, to prevent flood waters from traveling the original channel and flooding the airport. An earthen berm/plug/levee, will be constructed at the confluence of the re-routed channel, which runs Eastward and the original channel, which runs Southward. Stone riprap will be placed on the inside surface of the berm, to prevent the channel current from scouring the newly placed berm.

Location Description:

175 VTR - Airport Road, Tallulah, LA 71282

Activity Progress Narrative:

Clear Lien Certificate and retainage payment and final draw for administration.

Activity Description:

This shall be a drainage project to facilitate drainage in Bastrop and portions of unincorporated Morehouse Parish. Please see the attached map, for the area to be served. The project is all or selected portions of Staulkinghead Creek, which begins just West of LA 3051 and our area of interest ends about Spyke Road. Lateral W-10 flows into Staulkinghead Creek. Staulkinghead Creek is designated as W-9, which is a major drainage channel for the region. Drainage-access easements may be required for construction of berms, access with heavy equipment and shaping.

Location Description:

9404 Carbon Plant Road, Bastrop, LA 71220

Activity Progress Narrative:

Plans and specifications approved. Final temporary construction easements; identified bid process ready to begin.

Activity Description:

The Parish is applying for disaster recovery funds to provide connecting streets that will improve the vehicle circulation during evacuations; accordingly, providing residents an alternate route to pass if the street becomes blocked by trees and debris. The urgent need for a solution to this existing condition became ever more apparent during Hurricanes Gustav and Ike. While this matter has always been a concern for area residents, the Parish is unable to finance the activity on its own and there are no other funds available.

The identified streets are Barras Farm Road, Franklin Farm Road, Kilmer Farm Road, Luther King Farm Road and Zenon Farm Road. All five streets in the project are of similar construction. All streets will be 22' wide with 4' wide aggregate shoulders and open ditch drainage. The roadway section will consist of a 95% compacted subgrade with 6" thick compacted aggregate base course, 2" thick asphaltic concrete binder course and 1 1/2" thick asphaltic concrete wearing course. The roadside ditches will be graded to drain and have a 2 horizontal to 1 vertical side slopes. Bituminous coated corrugated steel culverts will be installed at all cross ditches as required. Temporary signs and barricades will be provided and installed by the contractor during the entire duration of construction. The total length of all streets within the project is approximately 6,590 linear feet.

Location Description:

5800 LA Hwy 44, Convent, LA 70723

Activity Progress Narrative:

Invoices for the evacuation street project from the engineering company and title research services. Also, included in the request is the report from Louisiana Coastal Services.

Activity Description:

Officials from Gramercy identified three phases of work in order to prevent flooding of homes within the town. Phase One will consist of opening, diverting, and improving segments of each canal as needed to improve the overall drainage capabilities of these canals. Phase Two would require installing the proper sized culverts on David Canal to eliminate restrictions of flows at the existing undersized culverts. Phase Three will involve the installation of flood gates at the outfall of one or more of these canals to prevent back flooding.

Location Description:

Gramercy, La. - St. James

Activity Progress Narrative:

This project provides additional drainage improvements to reduce storm water flooding.

Activity Description:

The Parish is proposing to replace the existing pier with a longer walking pier that extends over the current rock jetty. No structure presently exists over the jetty; therefore work would consist of installing support pilings, railings and deck boards over the entire length of the rock jetty. The existing channel must be cleared to remove any silt and the final task is to install appropriate channel marking lights for safer boat launch area ingress and egress.

Activity Description:

Create housing program in Opelousas, St. Landry Parish, LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. The assistance will have the objective to return individuals to decent, safe and sanitary conditions.

'Pending details on the specific applicants and uses of the program funds, OCD-DRU has estimated the percentage that will be spent on mitigation activities. OCD-DRU utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date LA has expended over \$8.5 billion for the Road Home program; additionally \$850 million dedicated to mitigation activities (\$750 through HMGP and \$100M through CDBG) for a total of approximately \$9.4 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned \$850 million plus \$879 million that have gone to Road Home elevations plus \$880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of \$2.6 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. To be conservative, OCD-DRU rounded to 25% for Gustav/Ike programs.

Activity Description:

During Hurricanes Gustav and Ike Disasters, the operations and capabilities of the Mayor, City Clerk, City Administrative Staff, Police, Fire and Utility Departments were severely hampered due to the lack of adequate alternate power as a result of extended electrical power outages experienced in Opelousas. The City's major operations are housed in the Municipal Plaza Building to provide coordination of emergency services and other disaster related assistance to the local community. These efforts include assisting citizens, distribution of bottled water and supplies and other governmental activities to those in need. Without an adequate source of power at the City's Municipal Plaza Building during periods of power outages, the City will be unable to provide these services in an efficient manner.

To mitigate the problems experienced with the power outages in Opelousas, the installation of a standby generator capable of providing power to the Municipal Plaza Building is proposed. The generator will be sized (one 250 KW diesel generator) to be capable of providing the necessary power to operate the Municipal Plaza and the generator will be installed at the rear of the Municipal Plaza Building on the west side, adjacent to the existing electrical services. The necessary wiring from the generator to the existing services will be installed below ground in the conduit in accordance with current codes and regulations. There are two electrical service entrances to the building (from the power company) and thus two (2) automatic transfer switches will also be

provided (which is more economical than redoing the services to the building) which will automatically start the generator and provide backup power to the building in the case of the loss of power from the utility company.

Activity Description:

Flooding and high wind related problems(i.e. power outages, downed trees, damaged roofs, broken windows, etc.) existed throughout the Parish. These problems identified numerous failures and the St. Landry Parish Government has been awarded \$1,037,566.00 of federal financial assistance under the FEMA Hazard Mitigation Grant Program (HMGP) to retrofit twenty-six (26) critical facilities in the Parish. The HMGP Program requires a local financial match of twenty-five percent and St. Landry Parish Government desires to utilize CDBG funds under this PIRP Program for this match.

Activity Description:

Provides for drainage and flood protection for residents and their homes of Ward 7 in Terrebonne Parish. The specific purpose of each of this project is to reduce the risk of flooding in the newly protected areas. This will be accomplished either through raising levee elevations, improving pumping capacity, or some combination of the two. Raising levee elevations improves the protection of the areas against storm surge and tidal inundation. Improved pumping capacity reduces the risk of flooding from rainfall within the levees.

The parish of Terrebonne has compiled further analysis of this activity. Through analysis of the HUD study area; parcels, addresses and aerial imagery were loaded into a map document. Addresses were selected using the HUD study areas and were queried for property types – public, commercial, and residential. The parcel layer for this study was queried to located adjudicated properties and aerial imagery was used to examine the adjudicated properties for the presence of a structure. The results of the study showed that 98.4% of the structures within the benefitting area are residential.

Location Description:

Terrebonne Parish, LA

Activity Description:

The specific purpose of this proposed project is to mitigate future flood damage. The project will provide a flood wall and flood gate that will prevent flood waters from inundating the target area and damaging/destroying homes, businesses, and the properties of residents. It is the most cost-effective measure as compared to elevating homes/businesses or buyout of all homes and businesses within the target area.

Location Description:

Located 12 miles south of Houma, LA.
Crosses Falgout Canal approximately
1500' west of LA Hwy 315 bridge Houma

Activity Progress Narrative:

Request includes Terrebonne Levee & Construction invoices for work completed through January 2019.

Activity Description:

West Baton Rouge Parish proposes to complete drainage upgrades from Louisiana Avenue to Rosedale Road which will direct future storm waters to three existing diversion canals located along LA Highway 1. In addition to improving drainage, the project will improve evacuees' access to a major north/south evacuation route by preventing roadway flooding. This project also will include an engineering study to determine if additional work needs to be done on Louisiana Avenue west of LA. Hwy. 1 at the intersections of: The North 11th Street right-of-way on the north side of Louisiana Avenue, North 12 Street, Johnson Street, Franklin Street, and Eleanor Street.

Activity Description:

The state is required to spend at least 10.6 percent (\$46,520,525 of the first allocation) of the entire allocation on affordable rental housing activities. Fifty percent of this dedicated portion shall be allocated to the five most damaged parishes, in proportion to their damages, for eligible programs to be administered by the parish. The remaining 50 percent will be administered by the state for implementation of affordable rental housing projects. The top 5 impacted parishes will have the option of establishing their own affordable rental housing programs or using their portion of the affordable rental housing allocation to participate in the state-implemented program.

Activity Description:

The primary goal of the Delcambre Fishery Recovery Project is to create/maintain employment in the commercial fishing industry and preserve the commercial commercial fishing culture of coastal Louisiana by providing the commercial fishermen with a means to sell thier catch at higher than wholesale market prices. This venue, which does not exist anywhere else in the area, will increase retail business within the community and create an attractive incentive for the commercial fishermen.

Location Description:

Activity Description:

Plaquemines Parish proposes to use its Gustav/Ike Sustainable Fisheries Grant Allocation of \$900,000 to mitigate the Buras Boat Harbor Site in order to provide permanent site improvements that will create capacity for current and future fisheries programs. Site improvements will consist of the following:

- Four hundred (400) linear feet of bulkhead and concrete dock
- Access to electricity and water will be set up on the dock so any vessels or equipment needing these services can have access quickly and be used to its highest efficiency
- Grading will be performed on the property to level the ground
- Limestone will be added to create a better road and working surface
- An eight foot (8) tall, two hundred and sixty two (262) linear feet, chain-linked fence will be erected to make sure security measures are in place.

Location Description:

Buras Boat Harbor Road, Buras, LA 70041

Activity Description:

The Franklin Canal floods with every surge event. The hurricane related storm surge travels up the Franklin Canal and floods approximately 300 homes and U.S. Highway 90, a major evacuation route. The Franklin Floodgate Sinkable Barge and Pump Station will not only block the surge from traveling up the Franklin Canal, but the pump station will also prevent storm water from inundating the closed system. The proposed improvements are installing a sinkable barge as a floodgate, additional levees, and a pump station. The drainage area affected is approximately 600 acres. The proposed levee would tie into the USACE Franklin and vicinity levee. The proposed pump station and sinkable barge are both new construction.

Location Description:

Franklin, St. Mary Parish, Louisiana

Activity Progress Narrative:

Activity in the QPR is a result of a change in the action plan. No expenditures in the quarter.

Activity Description:

The proposed project will include building a levee between an existing (8-1) forced drainage levee, located in Ward 10, Terrebonne Parish, Louisiana. The earthen levee will have a 10 crown levee using haled in material, initially construction to an elevation of +9.0 Geoid 3 NAVD 88 with two flow control structures. The flow control structures would be equipped with 9 each 6 ft. x 6 ft. flap gates, with 5 foot walkway on top of the structure for access to the gates.

Location Description:

Theriot, La. – Terrebonne

Activity Progress Narrative:

This request is for CPRA staff time. Also, changes were made to CPFI/CRAD activities moving funds from Lafitte Area Levee Repairs, Boston Canal, and Coastal Affairs Administration to Falgout Canal and Boston Canal activities. All changes are within the same project and thus no APA necessary.

Activity Description:

Located in Vermilion Parish, the flood control structure will consist of a braced (double wall) steel sheet pile structure constructed from bank to bank across the Boston Canal just south of the Intracoastal Waterway. The central 100 feet of the sheet pile structure will be open to flow and vessel traffic and will have a structure which will consist of a sill just below the existing Boston Canal bottom with a sheet pile seepage structure constructed just below the sill structure. This area has experienced flooding caused by tidal surges from tropical storms that originate in Vermilion Bay and travel inland through existing canals. These flood waters inundate homes and property causing substantial damage.

Location Description:

Erath, LA

Activity Progress Narrative:

This request is for CPRA staff time. Also, changes were made to CPFI/CRAD activities moving funds from Lafitte Area Levee Repairs, Boston Canal, and Coastal Affairs Administration to Falgout Canal and Boston Canal activities. Activity Description:

The purpose of this program is to provide a range of projects that will assist communities to recover from Hurricanes Gustav and Ike in a manner that protects them and makes them more resilient to future storms. This program includes coastal restoration and protection projects that allow coastal communities to recover and exist safely and sustainably, as well as planning and implementation projects that make the long-term transition to sustainable coastal communities possible. All projects involving construction within this program shall be managed and implemented by the State of Louisiana Office of Coastal Protection and Restoration (OCPR).

Location Description:

Match Contributed	\$0.00	\$0.00

Activity Description:

The intention of the Long-Range Development plan is to guide development in the City of Breaux Bridge so that it is more resilient to future disasters. The Long-Range Development will be created through the creation of new zoning ordinances guided by the planning process and examining the community’s topographic and flood maps to learn what features can be improved on and/or mitigated. A great deal of these new ordinances will emphasize research conducted by FEMA relative to wind speeds and its effect on structures as a result of poor construction specifications, as well as flood-plain and soil-quality maps for developing new land-use ordinances .

Location Description:

Breaux Bridge, St. Martin Parish, LA

Activity Description:

Repairing first responder communications infrastructure damaged by Hurricanes Gustav and Ike. LWIN, a complex two-way radio interoperable communications network, provides mission critical communications to more than 59,000 first responders across the state. These improvements will greatly enhance the public welfare and the citizens of Louisiana will be better protected in the event of future floods or hurricanes.

Location Description:

Gustav Ike affected parishes

Activity Progress Narrative:

Activity in the QPR is a result of a change in the action plan. No expenditures in the quarter.

Activity Description:

Louisiana Economic Development (LED), in partnership with the Louisiana Workforce Commission (LWC), is developing a website designed to meet the talent recruitment needs of Louisiana employers. Louisiana Job Connection has been created to match companies with qualified job seekers using a unique matching algorithm. The site is also intended to create a favorable image of the state as a place to live and work amongst prospective job seekers. Louisiana Job Connection will help match the needs of large industrial projects with skilled workers, creating more high-paying job opportunities for employees while also accelerating economic recovery of those parishes impacted by the hurricanes.
